

Helideck Limitation List (HLL)

Restrictions for Brae A

Flare sector 305°- 015°T If both flares flaring at full output.	Landings prohibited in this sector
If wind from 305°- 345°T	Only eastern flare on full output
If wind from 346°- 015°T	Only western flare on full output
Crew should be aware of the effect of turbulence that can be caused by the difference in wind strengths between the top of the derrick and the helideck.	

SECTOR	W/V	Limitations & Comments
